

48" PVC/Rubber Chevron Conveyor Belt

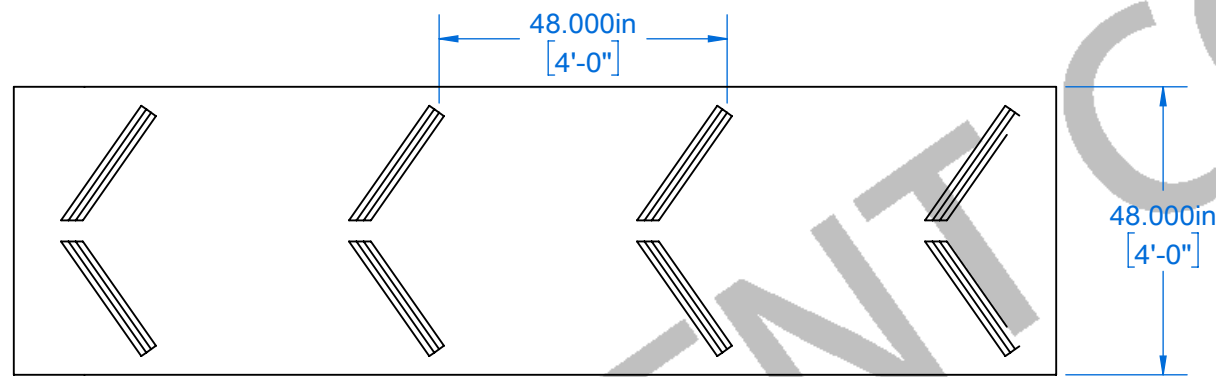

Fluent Conveyor Chevron Cleated Conveyor Belts are most commonly used to convey lighter weight materials such as wood chips, sand and gravel, grains, minerals, cardboard, plastics, paper, fines, ONP, and more. These belts are typically found on both slider bed conveyors and trough idler conveyors. These belts are consumable products and the shelf life depends on the end user and the material type. The chevron pattern comes in a few different designs such as: open chevron, close chevron, herringbone, u-shaped, cleated top, mini-cleated top, steep climb and multi-chevron. Chevron belts are in both rubber and PVC and can support cleat sizes from 1/8" up to 2". Optional integrally molded and hot vulcanized.

Common Application Usages

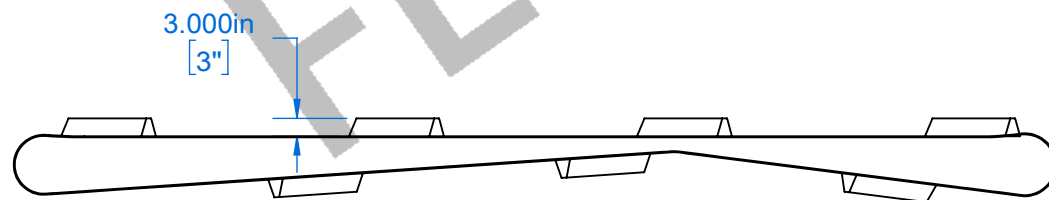

- Scrap Metal
- Automotive
- Agricultural
- Bio-Fuel
- MSW
- Single Stream
- Construction & Demolition
- Hot & Abrasive Materials

Options:

- Cleats
